

Instructions:

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	[TYPE PROGRAM NAME HERE]	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
The player presses the button to start the game.	The program checks to see if the player has won either the First or Second prize based on the number of tosses generated by the GameBooth class.	If the number of tosses is three the First prize will be displayed with some text, if the number of tosses is less than three the Second prize will be displayed instead after either one of the prizes is displayed the game will give the option to play again.
